

Economic Development

White Paper — Living Stones Foundation / Applied Data & Digital Innovation Lab (LATAM)

Prepared by: Manar Mohammed — Volunteer Data Analyst

Project Objective

The objective of this project is to analyze the key factors influencing economic development in Latin America through a data-driven approach. By exploring the relationships between economic and social indicators, the project aims to identify meaningful patterns, generate actionable insights, and support data-informed decision-making related to economic development in the region.

Scope

This project focuses on analyzing selected economic and social indicators related to economic development in Latin America, using World Bank Open Data as the primary data source. The analysis will be based on publicly available datasets and will include data cleaning, exploratory data analysis, data visualization, and interpretation of findings. The project aims to provide valuable insights into regional economic development without establishing causal relationships or predictive models.

Expected Deliverables

- A cleaned and organized dataset ready for analysis.
- An Exploratory Data Analysis (EDA) report highlighting key findings and trends.
- An interactive dashboard and supporting data visualizations presenting the analysis results.
- A summary of insights and recommendations related to economic development in Latin America.
- Final project documentation summarizing the methodology, analysis process, findings, and conclusions.

Timeline

Phase 1: Project planning and topic refinement.

Estimated duration: 1 week

Phase 2: Data collection and preparation.

Estimated duration: 1 week

Phase 3: Data cleaning and exploratory data analysis.

Estimated duration: 1 week

Phase 4: Data visualization and dashboard development.

Estimated duration: 1 week

Phase 5: Documentation, review, and final project submission.

Estimated duration: 1 week

Note: The timeline is estimated and may be adjusted based on project progress and data availability.

Roles and Responsibilities

Volunteer Data Analyst (Manar)

Responsibilities:

- Define the project objectives and scope.
- Collect, prepare, and validate relevant datasets.
- Perform data cleaning and exploratory data analysis.
- Develop visualizations and an interactive dashboard.
- Interpret findings and generate actionable insights.
- Prepare the final project documentation and presentation.
